Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant urges that Smith et al does not teach plastid transformation, only suggest it. Examiner pointed out that in 103 rejection over more than one reference all elements of the claim are not found in one piece of art. Applicant urges that there is no suggestion to make protein in chloroplast for the protein to be released upon damage to cell or making in plastid a protein whose function is to work outside the cell. Examiner suggested that Applicant bring in art showing that their result is unexpected.
